1. Based upon Applicants' remarks filed on 08/23/2005, the restriction requirement in the previous office action is hereby withdrawn. All claims 1-19 have been examined.

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

In the specification on page 1, between lines 1-2, --- This application is a divisional of Serial No. 09/681,917, filed on 06/26/2001, now Pat No. 6,677,774. --- has been inserted.

3. Claims 1-19 are allowable. The following is an examiner's statement of reasons for allowance:

The prior art does not disclose a method of determining a location of an Iddq defect within an area of an integrated circuit as recited in claim having a combination of steps of activating an Iddq defect to generate Iddq defect current within the integrated circuit, measuring amounts of the Iddq defect current at respective ones of the corresponding terminals and determining the location of the Iddq defect current based on the amounts of the measured Iddq current at the respective ones of the corresponding terminals in combination with other method steps of claims 2-5.

The prior art does not disclose a method for testing an integrated circuit substrate having a plurality of terminals on a surface having a combination method steps of dividing the surface into a plurality of areas, activating an Iddq defect to generate Iddq defect current within the integrated circuit and measuring an amount of the Iddq defect current generated within each area

as recited in claim 6 and in combination with other method steps of claims 7-14.

The prior art does not disclose a method for testing an integrated circuit substrate having a plurality of terminals on a surface having a combination method steps of dividing the surface into a plurality of areas, activating an Iddq defect to generate Iddq defect current within the integrated circuit and creating an Iddq current map and determining whether each area includes the IDD defect based on the Iddq current map and determining a location of the Iddq defect within the integrated circuit substrate based on the Iddq current map as recited in claim 15 and in combination with other method steps of claims 16-18.

The prior art does not disclose a method for testing an integrated circuit substrate having a plurality of terminals on a surface having a combination method steps of dividing the surface into a plurality of areas, applying a plurality of test patterns to the integrated circuit substrate, and measuring an amount of the current generated within each area and determining which of the plurality of test pattern activate the Iddq defects based on the measured amount of the current generated in each area and using the determination data input to a diagnostic tool and comparing a predicted activation behavior to the determination results as recited in claim 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
